## **Leiracoin:**

The Leiracoin is an Arabian cryptocurrency that links between the principle of the physical money and cryptocurrencies at the same time, through the real impact on the Ground, in addition by being a cryptocurrency in Wallet, and this process is done by linking the Leiracoin with a real investments and assets.

## **“Additional Information”**

### **Leiracoin advantages:**

The first advantage of the Leiracoin is that, it is the first Arabian cryptocurrency in the world, and its issuance coincides with the new vision for Arab countries in the Middle East to invest a lot of money in building new modern future cities, and therefore anyone wish to own some investment successes should pay attention In the Leiracoin.

The Leiracoin will be the first cryptocurrency in the world linked with two values at the same time, through the value of the Leiracoin itself, which changes according to the process of trading it through the Trading Platforms, and the process of supply and demand for commercial, real estate projects and investment opportunities available within modern future cities.

The Leiracoin will be the first cryptocurrency that allows you to feel safe and secure when you want to trade it, without looking at the rest of the cryptocurrencies in the world, because the Leiracoin means that if there is a certain decline in the cryptocurrency market, the markets of modern cities have not fallen yet and this means safe trading of the Leiracoin.

## How does Leiracoin work?

Leiracoin concept is the same as any other Cryptocurrencies in the Cryptocurrencies market. It is run on a distributed public ledger called blockchain, a record of all transactions updated and held by currency holders.

Units of Leiracoin are created through a process called mining, which involves using computer power to solve complicated mathematical problems that generate coins. Users can also buy the Leiracoin from brokers, then store and spend them using cryptographic wallets.

Unlike other cryptocurrencies If you own Leiracoin, you own tangible thing. because What you own is a key that allows you to live, invest and trade in the Assets and Projects of the modern Cities, also to move a record or a unit of measure from one person to another without a third party like other cryptocurrencies.

Although, more uses are expected in the future for Leiracoin. Transactions including bonds, stocks, and other financial assets could eventually be traded using the technology of Leiracoin.

## How to buy Leiracoin:

You may be wondering how to buy Leiracoin safely.

**There are typically three steps involved. These are:**

### Step 1: Choosing a platform

The first step is deciding which platform to use. Generally, you can choose between a traditional broker or dedicated cryptocurrency exchange:

- **Traditional brokers:** These are online brokers who offer ways to buy and sell Leiracoin, as well as other financial assets like stocks, bonds, and ETFs. These platforms tend to offer lower trading costs but fewer crypto features.
- **Leiracoin exchanges:** There are many Leiracoin exchanges to choose from, each offering different wallet storage, interest-bearing account options, and more. Many exchanges charge asset-based fees.

When comparing different platforms, consider what fees they charge, their security features, storage and withdrawal options, and any educational resources.

# Leiracoin Landing Page Content

## Step 2: Funding your account

Once you have chosen your platform, the next step is to fund your account so you can begin trading. Most crypto exchanges allow users to purchase crypto using fiat (i.e., government-issued) currencies such as the US Dollar, the British Pound, or the Euro, in addition of these options Leiracoin will allow users to purchase it using their investment in Assets, Stock and bonds in the modern future cities, using their debit or credit cards – although this varies by platform.

Some platforms will also accept ACH transfers and wire transfers. The accepted payment methods and time taken for deposits or withdrawals differ per platform. Equally, the time taken for deposits to clear varies by payment method.

An important factor to consider is fees. These include potential deposit and withdrawal transaction fees plus trading fees. Fees will vary by payment method and platform, which is something to research at the outset.

## Step 3: Placing an order

You can place an order via your broker's or exchange's web or mobile platform. If you are planning to buy Leiracoin, you can do so by selecting "buy," choosing the order type, entering the amount of Leiracoin you want to purchase, and confirming the order. The same process applies to "sell" orders.

# Leiracoin Landing Page Content

There are also other ways to invest in Leiracoin. These include payment services like PayPal, Cash App, and Venmo, which allow users to buy, sell, or hold Leiracoin.

## How to store Leiracoin:

Once you have purchased Leiracoin, you need to store it safely to protect it from hacks or theft. Leiracoin like any other cryptocurrency is stored in crypto wallets, which are physical devices or online software used to store the private keys to your Leiracoin securely.

Some exchanges provide wallet services, making it easy for you to store directly through the platform. However, not all exchanges or brokers automatically provide wallet services for you.

There are different wallet providers to choose from. The terms “hot wallet” and “cold wallet” are used:

- **Hot wallet storage:** "hot wallets" refer to crypto storage that uses online software to protect the private keys to your assets.
- **Cold wallet storage:** Unlike hot wallets, cold wallets (also known as hardware wallets) rely on offline electronic devices to securely store your private keys.

**Typically, cold wallets tend to charge fees, while hot wallets don't.**

## What can you buy with Leiracoin outside the modern future cities?

the number of institutions accepting cryptocurrencies is growing, large transactions involving it are rare. Even so, it is possible to buy a wide variety of products from e-commerce websites using Leiracoin.

Here are some examples:

### **Technology and e-commerce sites:**

Several companies that sell tech products accept crypto on their websites, such as newegg.com, AT&T, and Microsoft. Overstock, an e-commerce platform, Shopify, Rakuten, and Home Depot also accept it, and Leiracoin will be Accepted Too.

### **Luxury goods:**

Some luxury retailers accept Leiracoin as a form of payment.

### **Cars:**

Some car dealers – from mass-market brands to high-end luxury dealers – already accept cryptocurrency as payment and Leiracoin will be accepted in cars trading.

### **Insurance:**

many insurance companies around the world will accept Leiracoin as new type of payments.

If you want to spend Leiracoin at a retailer that doesn't accept it directly outside of the modern future cities, you can use a Leiracoin debit card.

## **Our Projects:**

### **1- NU Green Cement:**

#### **COMDEX ENTERPRISES & NU Green LLC MISSION 2023**

NU Green's purpose is to act on the climate and the environment in a different way and right now, by designing and producing decarbonated cements 0% clinker. Thanks to our innovative technological solutions, construction players will be able to significantly reduce their carbon footprint with eco-friendly concrete to create the sustainable cities of tomorrow.

The manufacturing process of NU GREEN cements promotes the circular economy by using local resources and co-products from the industry, thus preserving natural resources.

The industrial project that we are carrying out is renewing with a "new generation" entrepreneurial dynamism, integrating the environmental, social, and societal impact of its activities, in order to prepare a better and more sustainable future for future generations.

#### **A progressive network of the territory**

With our four technologies designed to produce decarbonated cements 0% clinker for all markets in the construction sector, our ambition is to initiate a real paradigm shift in the construction sector and prepare a better future for future generations.

In this sense, the first stage of our industrial deployment consists of the construction of our 1st production site in the middle east with the support of Leiracoin.

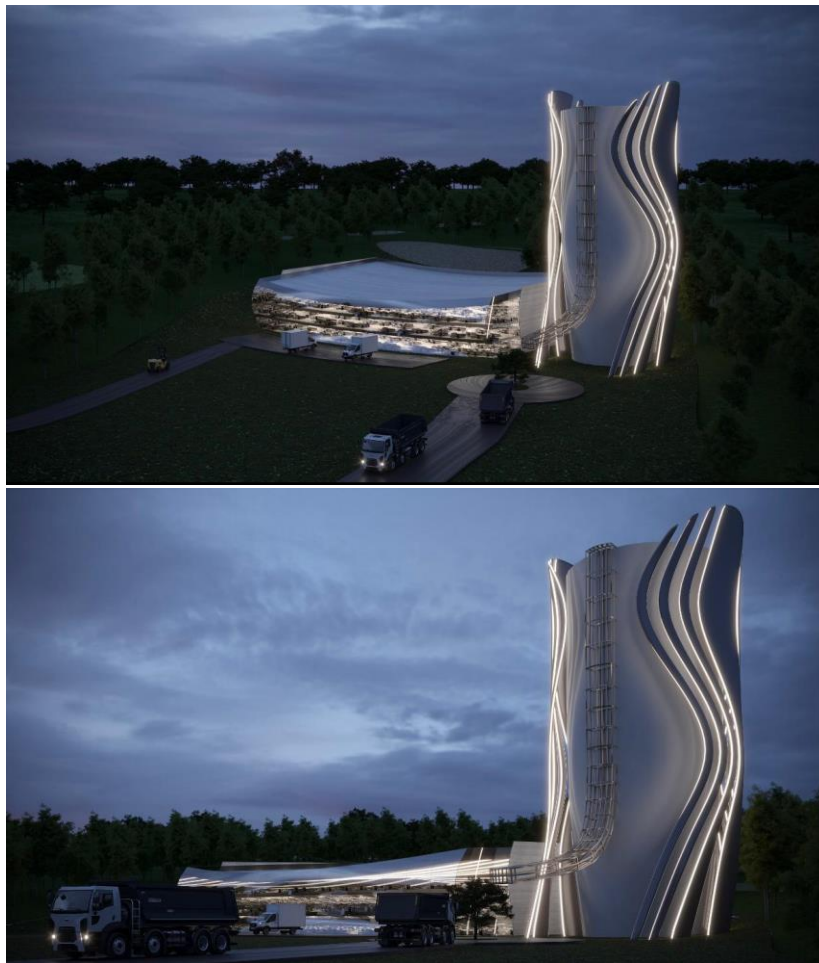

# Leiracoin Landing Page Content

## A fast-paced industrial history

By 2025, NU Green is targeting a 15% market share in USA, 20% in the Middle East, thanks to its three production sites, each offering maritime and/or land access facilitating the reception of raw materials and the shipment of NU cements. With this development necessarily comes the question of our impact. Our environmental impact, of course, but above all our societal impact. Being a company with an impact requires a clear perspective on its activity, on its model...

One of our challenges was to show that our cements can replace traditional cement in many applications. We are now bringing this proof with sails, foundations for solar trackers, pre-walls, slabs...

We are succeeding in this challenge: NU Green cements are capable of substituting in all types of operations.
